### **DETAILED ACTION**

Claims 1-52 are pending in this action.

#### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species of claims 1-5, 9, 13-24, 35-38, 42, 47-52, directed to an embodiment wherein the service providers comprise video rental chains, and wherein providing a repository database includes receiving different customer information, storing movie title information, making the movie title information accessible by the applications and receiving movie title information from movie distributors.
- Species 1, 6, 26-35, 39, directed to an embodiment wherein the central application provides a notification service.
- Species 1, 7, 8, 35, 40, 41, directed to an embodiment of registering the applications as clients and making access to the database secure through encryption.
- Species 1, 10, 11, 35, 43, 44, directed to an embodiment of receiving queries from the applications, analyzing data in the database, and returning a recommended list in response to the queries.
- Species 1, 12, 13, 25, 35, 46, directed to an embodiment wherein the service providers provide online retail services.

Art Unit: 3625

- Species 35, 45, directed to an embodiment of storing customer credential reports, and allowing customers to request reports directly from the central application to challenge the report's validity.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 26 and 47 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Stephen Sullivan on June 1, 2005, to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3625

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
